

DATA ANALYST | DATA SCIENTIST

Dual-degree Data Science and Data Analytics graduate and MSBA candidate with hands-on experience applying AI, automation, and statistical modeling to solve real operational problems. Skilled in Python, R, SQL, and VBA, with a track record of building automation workbooks, predictive models, and Power BI reporting that cut manual work and sharpen decision-making. Combines technical rigor with strong project coordination and community leadership experience, from automating production-line reporting at a Fortune 500 (Mohawk Industries) manufacturer to leading student and volunteer teams.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC | Master of Science in Business Analytics | May 2027
Berry College, Mount Berry, GA | Bachelor of Science in Data Science and Bachelor of Science in Data Analytics | May 2026
Honors: Dean's List (6x) | Bonner Signature Scholar | GPA 3.6/4.0

AREAS OF EXPERTISE

Process Automation | Business Intelligence | Data Visualization | Statistical Modeling | Cross-functional Collaboration | Data Mining
Project Management | Continuous Improvement | Adaptability | Community Engagement | Training & Development | Optimization
Data Analysis | Workflow Optimization | Stakeholder Communication | Time Management | Team Leadership | Presentation Facility

TECHNICAL SKILLS

Programming Languages: Java, SQL, LaTeX, Processing, VBA, DAX, Python
Statistical & Analytics Tools: RStudio, Stata, Tableau, Power BI, Excel (Macros/VBA), Pandas, NumPy, Scikit-learn
Development & Productivity Tools: GitHub, Eclipse, VS Code, Jotform, ChatGPT, Google Workspace

PROFESSIONAL EXPERIENCE

CONTINUOUS IMPROVEMENT INTERN | Mohawk Industries, Dalton, GA May 2025 – August 2025
▪ Leveraged AI-driven tools (copilot) to redesign production-line processes, automating workflows and improving efficiency.
▪ Developed 2 Excel/VBA automation workbooks and 5+ Power BI reports on machine efficiency and production metrics.
▪ Designed a 200-slide training program on Minitab to support continuous improvement initiatives across the plant.

CAMP COUNSELOR | YMCA, Newnan, GA June 2023 – July 2023, June 2024 – July 2024
▪ Led groups of students ages 7–12 using age-appropriate techniques and games to keep participants engaged and organized.
▪ Provided a safe, welcoming environment that supported students as they developed and transitioned into adolescence.

WAREHOUSE VOLUNTEER | Bagwell Food Pantry, Rome, GA August 2022 – May 2026
▪ Coordinated groups of 20–30 volunteers monthly, dividing them into smaller teams and guiding them on food pantry protocol.
▪ Maintained a fully stocked walk-in pantry and supported the packing of over 1500 meals for students weekly.

YOUTH DEVELOPMENT VOLUNTEER | YMCA, Rome, GA August 2022 – May 2026
▪ Mentored students one-on-one ages 5–12 in underprivileged areas, providing support and resources to help them develop.

ANALYTICAL PROJECT EXPERIENCE

Excel to System Automation Project: Automated an Excel sheet using VBA to generate a CSV file with the necessary data for tag creation. Once integrated into the system, the solution operated with nearly 100% accuracy, reducing reliance on manual input by over 75% and significantly improved the efficiency of alarm updates used to monitor key production metrics.

Red Wine Quality Prediction Model: Developed and evaluated six classification models (Logistic Regression, Decision Tree, Random Forest, SVM, MLP, Gradient Boosting) in Python to predict red wine quality from 11 physicochemical features across 1,599 samples, with Random Forest achieving the best cross-validation accuracy of 68.8% after hyperparameter tuning via GridSearchCV.

Cannabis Legalization & Unemployment Causal Study: Applied a difference-in-differences model in RStudio to estimate the causal effect of Colorado's 2012 cannabis legalization on unemployment, using state and year fixed effects (2006–2019). Found legalization reduced Colorado's unemployment rate by 0.70 points ($p < 0.01$) vs. control states, validated via an event-study robustness test.

Hispanic Earnings Gap in STEM Study: Estimated OLS regression models in Stata ($n = 77,796$) with interaction terms to test whether returns to education differ by ethnicity, quantifying the effects of Hispanic ethnicity and degree attainment on STEM earnings. Found a 9.7% baseline earnings gap for Hispanic professionals ($p < 0.01$) that narrows to roughly 3% at the Master's level and disappears at PhD/professional levels, while advanced degrees raised earnings 14–79% over a bachelor's.
